A PROJECT REPORT ON

UNIQUE BIO-IDENTIFICATION FOR HOME SECURITY ON IOT

SUBMITTED TO SAVITRIBAI PHULE PUNE UNIVERSITY, PUNE
IN THE PARTIAL FULFILLMENT FOR THE AWARD OF THE DEGREE

OF

BACHELOR OF ENGINEERING
IN
INFORMATION TECHNOLOGY

BY

Mr. VAIBHAV KALE	**B120428532**
Mr. ROHIT KASHID	**B120428534**
Mr. MEGHAN NAGVEKAR	**B120428540**
Mr. BASWARAJ WALKE	**B120428567**

UNDER THE GUIDANCE OF
PROF. G.M. GAIKWAD

Sinhgad Institutes

DEPARTMENT OF INFORMATION TECHNOLOGY
SINHGAD INSTITUTE OF TECHNOLOGY, LONAVALA
GAT NO. 309/310, KUSGAON(BK.),OFF MUMBAI-PUNE EXPRESSWAY,
LONAVALA, TAL. MAVAL, DIST. PUNE - 410 401

2017 - 2018

CERTIFICATE

This is to certify that the Project Entitled

UNIQUE BIO-IDENTIFICATION FOR HOME SECURITY ON IOT

Submitted by

Mr. VAIBHAV KALE	B120428532
Mr. ROHIT KASHID	B120428534
Mr. MEGHAN NAGVEKAR	B120428540
Mr. BASWARAJ WALKE	B120428567

is a bonafide work carried out by students under the supervision of PROF. G.M.GAIKWAD and it is submitted towards the partial fulfillment of the requirement of Bachelor of Engineering (Information Technology) Project.

This project report has not been earlier submitted to any other Institute or University for the award of any degree or diploma.

ABSTRACT

The document explains the importance of access to modern smart homes over the Internet, and highlights several security issues associated with it. In this work, we propose a two-step verification process for smart homes using a fingerprint i.e bio-identification and access credentials, which verifies the person and after owner accessing the home over the Internet. User fingerprint process is the very first verification process in our implementation. The sensor detects and creates the fingerprint image by determining the light and dark areas created by the fingerprint ridges .In this system, when a owner wants to access the home via the Internet, which requires the server access page, the server returns the login page with the Java fingerprint script. The user fingerprints are verified, if the verification is passed, then the gathered device fingerprint is analyzed to see if there are enough device fingerprinting parameters available to provide a comprehensive fingerprint of the user device.

ACKNOWLEDGMENTS

I have a great pleasure in presenting this report on "**UNIQUE BIO-IDENTIFICATION FOR HOME SECURITY ON IOT**" and to express my deep regards towards those who have offered their valuable time and guidance in our hour of need.

I would like to express our sincere and whole hearted thanks to my project guide PROF. G.M. GAIKWAD, head of department PROF. T.J. PARVAT and my project coordinator PROF. F.S. GHODICHOR for contributing valuable time, knowledge, experience and providing valuable guidance in making this project a success.

I am also glad to express my gratitude and thanks to our Principal Dr. M.S.GAIKWAD for their constant inspiration and encouragement.

Finally, before ending I would like to express once again my gratitude and thanks to all my friends who are involved directly and indirectly in making my project success.

List of Figures

Sr.no.	Name of the Figure	Page No
1	Raspberry pi Module B	15
2	Fingerprint Sensor Module	16
